

We solve these challenges

- Our customers – accountants, business auditors, legal advisors – want to digitalize their work and communication processes to make them more efficient
- These firms process huge amounts of sensitive data every day
- The firms communicate with their clients through a variety of channels – this is inefficient, complex, and time-intensive
- Data protection standards are neglected

This is what our solution looks like

- 5FSoftware is an innovative solution for digitalizing and optimizing the work and communication processes for professional firms and their clients
- The 5F platform can process large amounts of data, as well as structure and simplify work processes
- This optimizes document sharing, for instance, and communication between firm and client

Our advantages with the Open Telekom Cloud

- State-of-the-art technology with the highest data protection standards
- Trust in Deutsche Telekom: IaaS made & hosted in Germany
- Scalable server landscape in a dynamically growing environment, clustering with Kubernetes, SaaS platform with high-availability databases

5F
